

Pre-Owned Roll Off Truck, Hooklift Truck, Trash Truck, and Boom Truck Dealer Is Committed to a Higher Standard in Truck Sales, and Service.

Family owned used waste and refuse truck dealer, Apex Equipment of West Palm Beach, Florida, has made a commitment to continually raise the standard on used and refurbished trucks sales, and service.

After 10 years in the used vehicle sales industry, the owners of Apex Equipment decided they had seen enough of the behind the scenes typical tomfoolery, and shady shenanigans that go on in some used truck dealerships. They decided to distance themselves from those dirty deeds done dirt cheap, pirating-like practices, and take the more arduous road of morality. By committing to this ambitious path of rectitude, they hope to create a more ethical, and fruitful business model, that will lead the industry, and a legacy to pass on to their children.

Selling the highest quality pre-owned roll off trucks, hooklift trucks, trash trucks, grapple trucks, boom trucks, and chassis trucks, is the reason why the Apex family seeks out, and has developed relationships with municipalities, and other government, and private organizations, who have maintained their trucks to a higher standard, while in their fleets. Apex also continues to cultivate relationships with after-market manufacturers, to ensure that each truck gets the best care possible in the refurbish process, by using only the highest caliber parts, and supplies.

This commitment extends, not only to service before the sale, but also service after the sale. Therefore, Apex Equipment has established, and continues to establish relationships with certified mechanics, truck manufacturer dealerships, and other important affiliations across the United States, in order to maintain continuity of services, before and after the sale, from state to state.
